Complete prop operations

Everything your team needs to run

From first checkout to funded payout, FinOnical connects the operating journey in one configurable environment.

- Storefront and checkout
- Account provisioning
- KYC / AML
- Challenge management
- Risk and enforcement
- Funded lifecycle
- Payout workflows
- Affiliate / IB
- Trader cabinet
- Back office CRM

Automate the default

Route only flagged exceptions to your team.

One brain for every platform

Switch platforms and Keep your logic

Each integration becomes an adapter. Your challenge rules, risk decisions and workflows stay consistent across the operation.

The canonical advantage

Platform loss or migration becomes an adapter change, not a rewrite of your business rules.

Rules your firm can prove

Trust built into the engine

FinOnical makes the event log the source of truth ,The same inputs produce the same verdicts, with evidence preserved for review.

01 **Verifiable fairness**
Replayable breach and payout decisions with evidence snapshots.

02 **Immutable rule versions**
Accounts stay pinned to the exact rules sold at purchase.

03 **Process based evaluation**
Assess how a trader operates, not only the final P&L.

04 **Network ready intelligence**
Architecture designed for reputation and cross firm fraud signals.

Run the firm
Control the risk
Prove the outcome

For operators
One console for challenges, traders, funded accounts, payouts, affiliates and exceptions.

For risk teams
Real time monitoring, deterministic breach decisions and evidence snapshots built into the core.

For builders
Headless APIs, webhooks and configurable rules instead of one off deployments.

For growing groups
Native multi tenant and multi brand architecture with isolated operations on shared rails.

Why FinOnical?

Beyond the standard Prop CRM

The baseline tools are expected, FinOnical's advantage is the architecture underneath them.

01 Platform agnostic core
Six integrations normalised into one event model.

02 Deterministic engine
Every pass, breach and payout decision is replayable.

03 True API first
The product is headless at its foundation.

04 Expression engine
Rules and workflows change without code deployments.

05 Native multi brand
One deployment, many isolated brands

FinOnical

The prop firm operating system

By Finovation

One canonical core
Every platform
Every brand

Advanced OS and infrastructure for prop evaluation, funding, risk and payout operations.

PROP OS Canonical | Deterministic | Multi-brand
